STANLEY S. SILVERMAN
SUPERVISORY PATENT EXAMINER

Art Unit: 1754

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in telephone interviews with Ms. Baxam on September 7, 2005 and September 8, 2005.

In claim 10, line 5, "and" has been deleted. In the last line, the period (.) has been deleted and the term - - ; and - - has been substituted therefor. After the last line, the following new subparagraph has been inserted.

- - - (c) a device or element for heating the feed gas prior to introduction of the feed gas to the reaction zone. - -
- In claims 12 and 14, line 1 of each, "process" has been deleted and - - apparatus - - has been substituted therefor.

The following is an examiner's statement of reasons for allowance: The claims are allowable over Sisler et al (US 2,837,409) for the reasons presented by applicants on April 25, 2005 and August 24, 2005. In addition, apparatus claims 10 and 12-14 now require " a device or element for heating the feed gas prior to introduction of the feed gas to the reaction zone". There is no teaching, disclosure or suggestion of such a heating device in the apparatus of Sisler. Applicants' specification discloses the advantages of preheating the feed gases on page 8, lines 4-13 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
